

Robot Drone League Jr. (RDL Jr.) is an exciting K - 6 initiative designed to inspire young learners through open-ended challenges that promote creativity and innovation. Students engage in hands-on design, engineering, and programming, working with interactive robots and drones to develop problem-solving skills.

Participating in RDL Jr. strengthens math, science, and reading skills through a student-centered, collaborative game format. This engaging experience fosters essential 21st-century skills, preparing the next generation of innovators and problem-solvers for success in our global society.

 Join us for the RDL Jr. Educators Workshop!

 Date: October 3rd, 2025 from 10:00-2:00

 Location: PEF (Public Education Foundation)

1651 S. Holtzclaw Ave Suite 201

Learn More!

Cost \$750 (call Monroe for more details 423-827-3034)
